FUJITSU

Daniel Gheorghe

Certified PRIMERGY Pre-sales Consultant

Has successfully passed Fujitsu Technology Solutions' PRIMERGY Pre-sales training and exam, covering the following topics:

- System architecture and design procedures for new PRIMERGY S5 servers based on Intel Xeon 55xx ("Nehalem") processors
- Performance aspects and their optimization for single-server, non-virtualized, 1- to 2-socket PRIMERGY systems for small to medium-sized customers
- Availability aspects: redundancy, high availability
- Selling server management with ServerView and some possible implementation scenarios
- Using the SystemArchitect to configure PRIMERGY systems as efficiently as possible
- An extensive hands-on session using the SystemArchitect to design a file server and a Microsoft Exchange 2007 mail server.
